# Climate Projection Report

Train-Test Scatter Plot

This scatter plot visualizes the relationship between the training data and the target data, distinguishing between training samples and test samples.

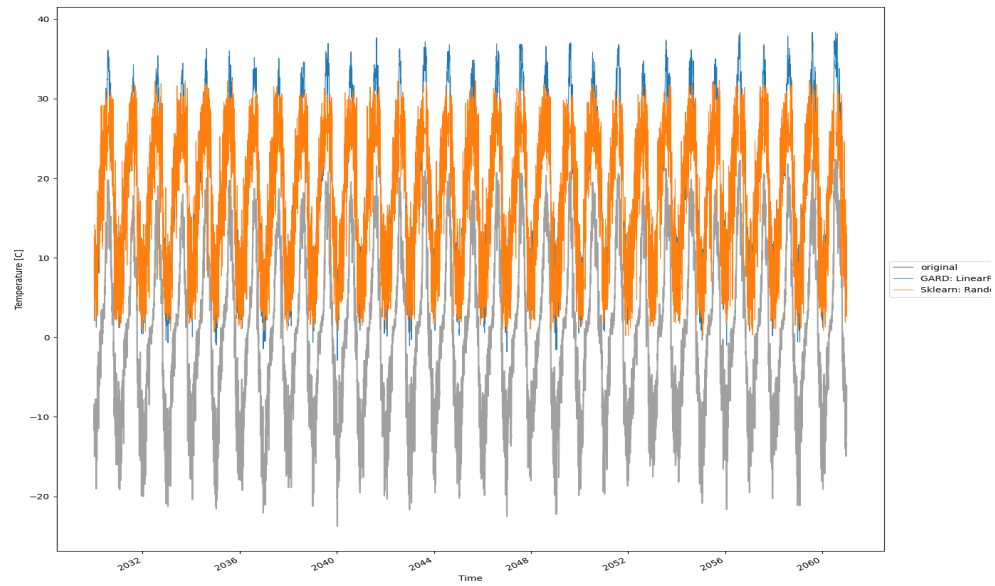

Temperature Plot

This plot compares the original training temperature data ('tasmax') and the target data ('max').

Prediction Plot

This plot shows the predicted temperature values by different models alongside the original climate data ('tasmax') and the target data ('max').

Detected Outliers

{'Time': {}, 'tasmax': {}}

Station Selected:

Astore

Variable Selected:

Tmax

Model Scores

GARD: LinearRegression: 0.66

Sklearn: RandomForestRegressor: 0.60
